Vonwaon Bitmap Font is a free Chinese pixel font released into public domain under [CC0 1.0](#) license.

The moulds are based on the open source project [BitmapFont](#). Tweaks have been made to optimize mixed usage of glyphs of different scripts, sizes, and type faces.

There are two variations available in the pack: 12px and 16px (9pt and 12pt accordingly). They are named after the pixel height of their primary mould. The TTF fonts look best when used in sizes that are multiples of that size.

There are 7543 glyphs in total, including 6763 Chinese characters. A Lite version is available, in case where file size matters, which has 4041 glyphs, including 3755 Chinese characters (second level Chinese characters are not included). Glyphs of Japanese Kana, Greek alphabet, Russian alphabet, Pinyin, Bopomofo, box-drawing characters, and enclosed alphanumeric characters are not included in the Lite version.

You're free to use the font in any project. There's no need to ask permission before using these. Giving attribution is not required, but is greatly appreciated :)

凤凰点阵体是免费的中文像素字体，使用 [CC0 1.0](#) 协议发布，属于公有领域。

字模基于开源项目 [BitmapFont](#)，针对汉字与非汉字、不同字号、字体之间的搭配使用进行了优化。
