### Overview

Please read the License section before use!

Thank you for your interest in **Silver**, the premiere multi-language pixel font for games and game-like. **Silver** has TRC and Lotcheck compliant gamepad buttons built right into the font, alongside a full keyboard and mouse prompts! No more overlaying images onto your text fields!

This is an on-going project and will be continuously updated with new Unicode Glyphs. The goal is to be the defacto font for pixel games and applications. Please consider a donation when using **Silver** in a final project.

### What Languages and Glyphs are supported?

We've made a helpful sticky to list all of the Unicode blocks, along with some notes for each. [You can find it here.](#)

### My CJK Character is missing or broken! Help!

Please report all issues with CJK Block Characters [in this thread](#), including additions, updates, and spacing fixes. This is an ongoing part of the project. There are a great many CJK characters, so please be patient!

### I need glyphs added immediately!

Please secure a direct License (info below) to receive priority support.
